

## **Optodisc DVD-RAM 4.7 GB Media Approved by DVD Verification Lab of M.E.I.- Class A Lab of DVD Forum for Rewritable DVD Standard<sup>(8/24)</sup>**

**Optodisc** DVD-RAM 4.7/9.4 /1.46/2.92 GB media has gained the approval of DVD Verification Lab of Matsushita Electric Industrial Co., Ltd.(M.E.I.) - Class A Lab of DVD Forum for Rewritable DVD Media Standard in August 2001, and became one of the very few in the world who won the recognition from DVD Forum for Rewritable DVD Standard; among this prestigious group are renowned brand names like Panasonic, TDK, and Maxell. Recognition from the Class A Lab of the DVD Forum serves as an endorsement of Optodisc's superior quality DVD-RAM discs.

Optodisc Technology Corporation was established in April 2000. '**Optodisc**'s success in producing the high quality product which meets the DVD Forum approval and moving into mass production in such short time should be all credited to our entire fully devoted staff.' said Mr. Jasper Chao, the President of Optodisc. Mr. Chao also pointed out, 'According to M.E.I.'s forecast, the demand DVD-RAM media in 2001 is 20,000,000 pcs. **Optodisc** produces 1,000,000 pcs this year and therefore can reach 5% market share. By 2002 Q1, **Optodisc** will increase monthly production to additional 500,000 pcs'. **Optodisc** is currently cooperating with ITRI to jointly develop DVD-RAM 8.5GB double layer technology; **Optodisc** has also successfully developed DVD-RW, DVD+RW media at present stage.
